RUSTEM NURIEV

OBJECTIVE

With my extensive experience, education, and proficiency in a wide area of Software Testing and Quality Assurance; different Testing Automation Tools; programming on C# .Net, SQA Basic, Groovy, Perl, Bash, HTML, SQL; as well as, experience in QA Audit and in-house training and supporting client end-users, I am seeking a position of a Senior Software QA / Software QA Lead.

SKILLS/ABILITIES

Employing various automated software for functional, regression, system integration and performance testing.

Managing QA, QC, Software Testing for various web-based ERP and other systems.

Certificates in QA, Big Data, Scrum Team facilitation.

Experience:

April 2017 – November 2017

Software Development Engineer in Test and Manual Quality Assurance Engineer – Capital Group Inc by Luxoft USA;

Financial Software. Development of scripts to support test automation via proprietary SIA framework as a part of the Client's SDET team. Web-, Desktop- and Back-End-applications under test.

Performed Manual and Automated – Functional and Regression testing. Test cases preparation. Bug tracking. Improvements – requirements preparation and tracking. Preparation of test reports.

Support of client System Testing team.

March 2015 – March 2017

Software Quality Assurance Team Lead – Tungsten Network Inc by Luxoft LLC

Financial Software – e-Invoicing. Manual QA Lead. Established QA Testing processes on the Complex ETL & CEP software development and maintaining project.

QA and Testing new features/releases for Back-End-, SOAP- & REST Web Services-, Web-UI-, Desktop- and Mobile-Applications. Performed Functional, Regression, Load, Performance, and Soak testing.

Test cases, plans and strategy preparations. Sign off test plan and strategy with clients. Bug tracking. Improvements – requirements preparation and tracking. Preparation of test reports.

Support of client UAT team, which includes but not limited with software developed by the team.

Managing QA-team/efforts on the project (5 Manual Testers). Coordination of Automation for the project (3 SDET's) and Deployment to a set of Cloud-based machines for the project (Rundeck, Jenkins). Policies formulation and people development.

August 2011 – February 2015

Manual Test QA Lead & Automation Architect – Medhost Inc by SoftServe Inc

Healthcare Software. Prepared POC for Testing Automation approaches for Web-, Desktop- and Mainframe-Software apps. Established QA testing processes on the new project from the scratch. Managed quality, Audited processes and quality of products and suggested improvements. Involved in QA policies formulation, proposals for new products. Created proposals for Testing Automation, managed the proposals implementation. People training and development. Preparation of ramp-up materials.

Education

Tavria National University, Department of Computer Science - Post Graduate Studies in Specialty of Hybrid Logical Decision Support Systems.

Department of Mathematics - Graduate Degree in Mathematics

Moscow State University - Undergraduate Degree in Mathematics

COMMUNICATION: During my six-year tenure as a lecturer for undergraduate computer science students at the Crimean State Engineering Pedagogy University, my skills at communication were greatly enhanced in delivering content in various areas of studies.

LEADERSHIP: In more than four jobs I have held the Team Lead position, which has given me great experience in my leadership abilities and skills.
